

# A2-Central Catalog

Get the books, software, and equipment you need from the warmth of your own computer room. **No handling fees** or extra charges for surface shipping, even though we ship within 24 hours. To order, use the self-mailer that was in the envelope with your newsletter.

November 1989

## Avoid Aftershave and Perfume Sale

### Save 10% during our big holiday sale!

Send us 10 per cent less than the prices shown in this catalog and still get **free** surface shipping and **24-hour** order turn around between now and the end of the year.

Sale prices apply to everything we sell except

subscriptions and back issues. Orders must be received on the self-mailer order form included in the envelope with your newsletter.

Simply calculate a subtotal on your order form for the items you list (don't include the cost of subscriptions or back issues preprinted on the order form) and deduct 10 per cent from that amount. You can even take the 10 per cent off of our buried treasure items.

Now is the time to let your kids know what you really want for the holidays (avoid more aftershave or perfume!).

## Buried Treasures Sale!

Last month's buried treasure sale continues through November 30.

### General Interest Books

#### *Mastering AppleWorks, Second Edition*

by Elna Tymes

This book is a comprehensive introduction to AppleWorks with a broader scope than the manuals that come in the box with the program. In addition to covering AppleWorks, it includes an excellent section on DIF files, a brief overview of Applesoft, and a 'business toolkit' of spreadsheet templates. Used as a textbook in many AppleWorks courses, this book is a good way to get started and up-to-speed with AppleWorks.

SY-007 \$16.95 (reg \$21.95) 1987

#### *In Search of the Most Amazing Thing*

by Tom Snyder and Jane Palmer

Former 'bad student' and teacher Tom Snyder is now a prolific author of educational software. Nonetheless, in this book Snyder argues that it's essential that parents and teachers recognize the limits of technology in education. 'Computer-oriented problem solving and logical thinking are not universally applicable skills. Neither does programming teach precise thinking, for it is every bit as possible to write a sloppy program as a sloppy essay.'

AW-013 \$9.25 (reg \$10.95) 1986

#### *ImageWriter LQ Reference Manual*

by Apple Computer, Inc.

This is one of the volumes from Addison-Wesley's Apple Technical Library. It's the definitive guide to the ImageWriter LQ printer. It includes all the information missing from the user manual that came in the box with your printer, including descriptions of what the hardware and software switches do, how to use the 75-plus commands that control character features, and how to use optional equipment such as the cut sheet feeder and the AppleTalk interface card. Includes a glossary, comprehensive index, and a quick reference card.

AW-025 \$17.95 (reg \$22.95) 1988

#### *Graphic Design for the Electronic Age*

by Jan V. White

Subtitled 'The manual for traditional and desktop publishing', this book makes good graphic design accessible to everyone. It's a big, beautiful book that includes advice and examples on how to choose a typeface and size, how to select a column width, how to handle pictures and captions, how to design single pages, and how to construct entire publications.

WG-001 \$21.95 (reg \$24.95) 1988

### Programming Books

#### *Applesoft BASIC Programmer's Reference*

by Apple Computer, Inc.

Yep, this is Apple's definitive description of Applesoft. It's one of the books in Addison-Wesley's Apple Technical Library. This is where real programmers go when they're looking for exact command syntax, what error messages really mean, and a list of the PEEKs, POKEs, and CALLs guaranteed to always work from within Applesoft. Includes a quick reference card, a glossary, an index, and complete information on everything from POS to ROT=.

AW-021 \$18.95 (reg \$22.95) 1987

#### *BASIC and the Personal Computer*

by Thomas Dwyer and Margot Critchfield

While not specifically about Applesoft, this book is generally recognized as the best textbook on BASIC ever published. It's written in a friendly and informal style and requires no previous experience with computing or programming. Includes a large number of illustrations that clarify both beginning and advanced concepts. The copies we have are from the book's 15th printing (January 1988).

AW-015 \$14.95 (reg \$16.95) 1978

#### *Apple IIgs Assembly Language Programming*

by Leo J. Scanlon

For readers who have done some programming in BASIC or another high-level language, this book provides an introduction to the Apple IIgs toolbox and shows how to access it through assembly language. Includes complete coverage of the 65816 microprocessor's instruction set and step-by-step procedures for using the Apple IIgs Programmer's Workshop assembler. Includes extensive chapters on 'Drawing with QuickDraw,' 'Events,' 'Working with Windows,' 'Menus,' 'Controls,' and 'Conducting Dialogs.'

BB-001 \$19.95 (reg \$24.95) 1987

## A2-Central Video and Audio Tapes

The following tapes are from the July 1989 **A2-Central Developers Conference**. Video tapes are in the VHS, NTSC format commonly used in North America. They will not play on VHS, PAL format VCRs used in other parts of the world. Audio tapes use the standard cassette format used all over the world.

### Pricing

Video tapes		Audio tapes
\$23.00	each	\$7.00
\$128.00	set of any 6	\$39.00
\$236.00	set of any 12	\$72.00
\$325.00	all 18	\$99.00

To order, select the tapes you want. Use the price shown in this table for the type and quantity of tapes you order. Full descriptions are in the September 1989 **A2-Central** catalog.

## The A2 Software Library

### Apple IIgs software

#### MacroMate

**MacroMate** is a Classic Desk Accessory program for the Apple IIgs. It allows you to create "macros," or automated keystroke sequences, that work with almost any program you can run on the IIgs, including DOS 3.3, Pascal, ProDOS 8, and GS/OS software. You can set up macros to do things when you press a **MacroMate** command key, such as solid-apple-R. Things I'lluch as typing in your letterhead, or providing the keystrokes a copy program needs to automatically move a set of files to your RAMdisk, or reconfiguring a program from a stupid set of command keys to command keys more to your liking.

**MacroMate** allows you to "record" a macro by typing it in live, or you can use its built-in editor to create your macros. You can have several different macro files for your programs. If you own **SoftSwitch**, you can even use **MacroMate** to switch from one workarea to another.

RW-006      MacroMate      \$37.50

#### HyperStudio

By Ken Higgins, Michael O'Keefe and Dave Klimas. A hypermedia authoring system for the Apple IIgs. You create "stacks" made up of "cards." Each card consists of a graphic background and can also hold text objects, graphic objects, sounds, and buttons. Buttons can be used to move to another card, stack, or program, to play a sound or video, to activate an animation, or to execute an external assembly language command you write yourself. Buttons can also keep test scores. See our June catalog for more information.

RW-005      HyperStudio      \$99.00

#### The Graphic Exchange

Allows you to exchange virtually any Apple II graphic image from one format to another. Supported formats include single and double low-, high- and super-resolution, **PrintShop**, **PrintShop GS**, and **Newsroom**. Can also read **MacPaint** files on a Macintosh disk. Graphics can be examined, cropped, and scaled. See our May catalog for more information.

RW-004      The Graphic Exchange      \$37.50

#### SoftSwitch

Turns your Apple IIgs into a deskfull of Apple IIes you can use at the same time. Switch instantly between different ProDOS 8, DOS 3.3, or Pascal programs. Return to any of the programs exactly where you left off.

You can save suspended programs in mid-operation. Also allows you to copy and paste graphics screens between programs and you can "take snapshots" of any graphics or text screen. See Nov 88, page 4.75, for more. Requires 768K minimum IIgs. New un-protected version.

RW-003      SoftSwitch      \$45.00

### Diversi-Tune

By Bill Basham. This software turns your Apple IIgs into a MIDI synthesizer, recording studio, and hi-fi system. Use it to listen to pre-recorded **Diversi-Tune** music, or record your own MIDI instrument notes--then synthesize them, edit them, or mix them. See our July 1988 issue, page 4.45, for more information. See our software library listing below for song disks currently available.

DR-001      Diversi-Tune      \$59.00

#### Diversi-Tune Song Disks

Most of these disks include the words of the songs as well as the music. You can display the words on screen (with a bouncing ball) while the music plays if you like.

DR-101	Nathen Page Live Jazz Piano	\$24.95
DR-102	Gay Nineties	\$14.95
DR-103	American Folk/Patriotic	\$14.95
DR-104	Christmas Songs	\$14.95
DR-105	Jewish Songs	\$14.95
DR-106	Gospel Songs	\$14.95
DR-107	Nathen Page Studio Jazz	\$24.95
DR-108	Classical Organ Favorites	\$24.95
DR-109	Classical Harpsichord Duets	\$24.95
DR-110	Bill Basham--Rock Improvisations	\$24.95

### ProDOS 8 software

#### Fastdata Pro

Use this program to quickly scan our monthly disks, the full text of our back issues, the full text of Apple's tech notes, or your own files. Find the information you need fast. You can search, print, cut & paste any file type. Scroll up and down. Allows you to change disks and continue search.

FD-001      Fastdata Pro      \$49.95

#### DB Master Professional

This is the most sophisticated data base management software available for the Apple II. Individual records can have up to 30 screens of text (or 200 fields or 2,000 characters). "Import rules" and "Export rules" allow a file to be related to as many as 10 other files. Reports can include up to 255 lines per record, including headers, subtotals, formatting, statistics, and much more. See April catalog for additional information.

SE-001      DB Master Professional      \$245.00

### Development tools

#### Micol Advanced Basic--Ile/Ilc

MS-002      Micol for the Ile/Ilc      \$89.00

#### Micol Advanced Basic--IIgs

MS-001      Micol for the IIgs      \$99.00

#### Merlin 8/16

Four assemblers in one (DOS 3.3, ProDOS 8-bit, ProDOS 16-bit, GS/OS), disassembler, Nifty List debugger, disk and file utilities, and sample files.

RW-002      Merlin 8/16      \$99.00

#### Programmer's Online

##### Companion for the IIgs

Programmer's Toolbox crib sheet in the form of a Classic Desk Accessory. Supports cut and paste with Apple Programmer's Workshop.

AW-033      IIgs Online Companion      \$37.50

# The A2 Hardware Collection

## SVI MA-100 speakers

Add powered sound to your IIGs! We've sold all the Yamaha speakers we had, but Bill Basham has found these SVI speakers that we're able to sell for the same price. You get two speakers with a built-in stereo amplifier, volume control, and balance adjustment. Effective frequency range is 70 to 16000 Hz. Each speaker is 230 x 150 x 165 mm and the pair weighs 3.5 kg. Made in China. Work with the IIGs or unpowered outputs such as those found on Walkman-type recorders.

DR-002 SVI Speakers U.S. orders only! \$129

## ModuNet network connectors

Build your own network. ModuNet connectors are replacements for the expensive connectors Apple sells to hook devices to its AppleTalk (LocalTalk) network. Not only do they cost less than Apple's connectors, these work with inexpensive telephone wire (not supplied) rather than expensive Apple cables. You need one connector for each computer and each printer on the network.

OE-001 8-pin for IIGs, new Macs \$34.95  
OE-002 9-pin for old LaserWriters, old Macs \$34.95

## Automatic incoming call router:

You can connect three devices to this switch. Incoming calls are first checked to see if the calling device is an autodial fax machine. If it is, the call is automatically routed to switchbox extension 1. All other incoming calls are routed to the primary switchbox line. However, either the caller or the receiver can transfer the call to switchbox extension 1 or 2 by simply pressing the 1 or 2 touchtone key on their phone. See our May catalog for more money-saving uses.

TF-500 Automatic Call Router \$395

# CIRTECH products

## Cards for the IIGs memory slot

### plusRAM GS-8

The GS-8 uses standard 1-meg chips and can be expanded up to 8 megabytes on one card--the maximum RAM capacity of the IIGs. No other company builds a single card for the IIGs memory expansion slot that can expand to 8 megabytes using standard RAM chips.

CIRTECH's custom LSI chips mean these cards use very little power and create very little heat. CIRTECH's GS-8 is the most-expandable, highest-quality IIGs memory card available in the world at one of the world's lowest prices.

Not compatible with Applied Engineering's RamKeeper or the IIG retrofit IIGs motherboard (won't fit inside IIG case).

## Memory card prices

Prices good through September 30, 1989

GS-8 and PR-16 cards:

GS-8 order no	memory supplied	\$	PR-16 order no
GS-8-1	1M	449	PR-16-1
GS-8-2	2M	599	PR-16-2
GS-8-3	3M	749	PR-16-3
GS-8-4	4M	899	PR-16-4
GS-8-5	5M	1,049	---
GS-8-6	6M	1,199	---
GS-8-7	7M	1,349	---
GS-8-8	8M	1,499	---

### Unit pricing:

Buy CIRTECH's base card and stock it with your own chips, if you like. Our 1-meg RAM prices reflect a charge of \$18.75 per chip, installed and tested.

ROMdisk expansion cards		STAT-256 expansion cards	
(no chips)	ROM-256 \$89	64K	SD-256-1 \$159
(no chips)	ROM-512 \$89	128K	SD-256-2 \$189
		256K	SD-256-3 \$249

## Cards for IIGs standard slots

### plusRAM PR-16

CIRTECH's PR-16 memory card is a standard-slot memory card that can be used in the IIG-Plus, IIG, or IIGs. It uses standard 1-meg RAM chips and can be expanded to 4 megabytes on one card (with forthcoming 4-meg chips it can be expanded to 16 megabytes). The card works as a RAMdisk. On a IIG, AppleWorks v1.3 and higher automatically expand their desktop into this type of card (1- or 2-megs only). We can supply a patch so AppleWorks will use this card on a IIGs as well. Cards can be partitioned as RAMdisks for different operating systems using software supplied with the card by CIRTECH.

## StatDisk

CIRTECH's StatDisk is a completely new concept in storage technology. No other company makes anything like it. Your computer and software think the StatDisk is a standard-slot RAM card, such as CIRTECH's PR cards. What makes the StatDisk different is that what you store on it stays stored after you turn the power off—even after you pull the card out of the computer! A small battery (built right onto the card and automatically recharged when your computer is on) keeps your data safe for over two months. No other data storage medium is faster, quieter, or more reliable. No cords. Instant-on reliability (turn your computer on and boot into AppleWorks before your monitor warms up). See our October 1988 catalog for complete information.

StatDisk order no	memory supplied	\$
SD-1	128K	209
SD-2	256K	269
SD-3	384K	329
SD-4	512K	389
SD-5	640K	519
SD-6	768K	579
SD-7	896K	639
SD-8	1M	699

### Unit pricing:

Buy CIRTECH's base card and stock it with your own chips, if you like. Our 32x8 low-power CMOS static RAM prices are \$15.00 per chip, installed and tested.

### StatDisk piggyback expander

We've already included this card in the StatDisk prices shown above. This order number is for use only if you previously purchased a 512K or smaller StatDisk that you now want to expand.

64K	SD-PIG	\$159
-----	--------	-------

CIRTECH's StatDisk was  
Nibble's  
Editor's Spotlight Selection  
April 1989, page 120

## CIRTECH Fans, SCSI products

### COOL-IT fans

Okay, you know you need a fan but you can't stand the noise. Neither could the guys at Cirtech. So they designed a pair of whisper quiet fans for the IIGs and the IIG. CIRTECH's fans use high-quality bearings, special PBT fan blades and anti-vibration mounts. The IIGs fan is three times quieter than Apple's own fan and uses just one-third the energy.

Fans install in about two minutes. Operate directly from the Apple power supply, you have no power cord to run. CIRTECH's fans install on the side of the power supply on the IIGs and under the keyboard of the IIG. Each lowers the internal temperature of your computer by 10 degrees or more.

SPECIFICATIONS: Current 65 mA; power 0.78 W; noise 22 dB.

CT-FAN-GS Cool-It for the IIGs \$49  
CT-FAN-E Cool-It for the IIG \$49

### SCSI interface card

CIRTECH's SCSI interface card brings the world of SCSI hard disks to your Apple IIGs, IIG, or IIG-Plus. SCSI stands for "Small Computer System Interface". This is a standard, defined by the ANSI X3T9.2 specification, which devices such as the Seagate STxxxN family of hard drives adhere to.

CIRTECH's card comes with software that allows you to split SCSI hard disks for use with up to four operating systems--ProDOS (or GS/OS), DOS 3.3, Pascal 1.3, or Microsoft Softcard CPM 2.20B or 2.23.

Unlike Apple's SCSI card, CIRTECH's card, with the addition of SCSI network software, can be used to share one or two hard disks among as many as six or seven computers (a maximum of eight devices total). Each computer has a private area on the disk.

CT-SC SCSI Interface Card \$99

### SCSI network software

CIRTECH's Multi-User SCSI software allows several computers to "share" up to two high-capacity storage devices. This provides a cost-effective way to attach several computers to a hard disk. Using a 64-megabyte Seagate ST277N hard disk assembly, for example, six computers could have "private" 10-megabyte hard disks for \$200-\$250 per computer.

The software splits the hard disk up into "user partitions". Only the computer that owns the partition can write to it. Partitions can also be "read-protected" at the users option. Operating system partitions can be created inside a user partition.

Each computer also has access to a "common" partition that can be used for read-only data and program storage. You'll need a CIRTECH SCSI card for each computer and one network package.

CT-NET SCSI Network Software \$99

# Subscriptions, Back Issues, Ordering Information

## Ordering Information

If you received this catalog in the envelope with our newsletter, there was also a one-sheet self-mailer in the envelope. Your name, address, expiration date, and account number are already imprinted on one side of the self-mailer—on the other side you'll find an order form. Please use this form to order stuff from us. When you fold and lick the form as shown, our address will be on the outside. Add a stamp and it's ready to mail. Please don't send us a photocopy of the form unless you remember to photocopy **both sides**.

If you received this catalog without a self-mailer, write your order on a plain sheet of paper and send it to:

**A2-Central**  
**P.O. Box 11250**  
**Overland Park, KS 66207**

## A2-Central subscriptions

The expiration date of your current subscription is shown on our self-mailer to the right of your name ("last issue").

We offer one-, two-, and three-year subscriptions to either our newsletter only or to a combination newsletter and monthly 3.5 disk. The disk includes an electronic copy of our newsletter for full-text searches, new public domain and shareware software and data files, and Apple system software updates.

	newsletter only	newsletter & 3.5 disk
1-year (12 issues)	S-1 \$28	D-1 \$84
2-year (24 issues)	S-2 \$54	D-2 \$162
3-year (36 issues)	S-3 \$78	D-3 \$234

Subscription prices include **free AIR MAIL** delivery anywhere on the face of the earth.

## Back issues

**A2-Central** (formerly **Open-Apple**) has been published monthly since January, 1985. Single back issues are \$2 each. Bound, indexed annual volumes are \$14.95. A full set of bound volumes and single issues for the current year is available for \$39.

The **Full-Text on Disk** version of our back issues is shipped on 3.5 disks and takes up about 4 megabytes of hard disk storage. Use with full-text search software.

### Open-Apple: Volumes 1-4

OA-001	\$14.95	Jan 1985—Jan 1986
OA-002	\$14.95	Feb 1986—Jan 1987
OA-003	\$14.95	Feb 1987—Jan 1988
OA-004	\$14.95	Feb 1988—Jan 1989

### Full Set Specials (every issue ever published)

FS-N	(volumes and singles)	\$39.00
FS-D	(full text on disk)	\$39.00

## A2-Central Monthly Disks

Our monthly disks are a hit! More than one subscriber in eight now gets a disk along with their monthly newsletter. Our 3.5 inch disks are one of the best software values available for the Apple II.

### \$4.67 a disk

Our disks can appear automatically in your mailbox each month for less than what most user groups charge for public domain 3.5 disks. You get our paper newsletter at the standard \$28/year rate plus 12 3.5 disk for less than \$4.67

each. Subscription prices are \$84 for one year, \$162 for two years, or \$234 for three years.

### \$4.75 a disk

Current newsletter subscribers can easily convert to a disk subscription. Figure out how many disks you'll get between the first one you want and the month your subscription expires (shown to the right of your address on our self-mailer order form ) and send us \$4.75 per disk.

### \$6.00 a disk

Our disks are available in quarterly sets:

A2-89S1	Quarterly disk set (Feb/March/April)	\$18
A2-89S2	Quarterly disk set (May/June/July)	\$18
A2-89S3	Quarterly disk set (Aug/Sep/Oct)	\$18

### \$10.00 a disk

We don't recommend you buy them this way, but if you insist, we'll still sell you any single disk for \$10.

#### 6502 Assembly Language

AW-012	Finley/Myers: Asm Lang for Applesoft Prgmmer	\$18.95
RW-001	Wagner: Assembly Lines: The Book	(see 6/88) \$19.95
DS-004	disk for this book	\$15.95
MB-007	Leventhal: 6502 Asmbly Lang Prog.	\$19.95
MB-008	Leventhal: 6502 Subroutines	\$19.95

#### Technical References

AW-003	Apple: Apple IIc Technical Reference	\$24.95
AW-004	Apple: Apple IIc Technical Reference	\$24.95
SS-001	Little: Inside the Apple IIc	\$19.95
SY-003	Campbell: The RS-232 Solution, 2nd Ed	(see 6/88) \$21.95

#### Troubleshooting and Repair

HS-001	SAMS Computerfacts: II, II-Plus	\$24.95
HS-002	SAMS Computerfacts: IIc	\$24.95
HS-005	SAMS Computerfacts: IIc	\$39.95
HS-003	SAMS Computerfacts: Disk II	\$24.95
HS-006	Brenner: Apple II Troubleshooting/Repair Guide	\$19.95

### Working with the Apple IIgs

#### Toolbox Programming

AW-011	Apple: Programmer's Intro to IIgs (w/disk)	\$32.95
AW-019	Apple: Apple IIgs Toolbox Reference, Vol 1	\$26.95
AW-006	Apple: Apple IIgs Toolbox Reference, Vol 2	\$26.95
CB-005	Gookin/Davis: Mastering the IIgs Toolbox	\$19.95
CB-007	Gookin/Davis: Adv Prog Tech for IIgs Toolbox	\$19.95

#### GS/OS, ProDOS 16

AW-020	Apple: ProDOS 16 Reference (w/disk)	\$29.95
AW-026	Little: Exploring Apple GS/OS and ProDOS 8	\$21.95
DS-006	disk for this book (3.5)	\$15.00

#### 65816 Assembly Language

CB-002	Wagner: IIgs Machine Lang for Beginners	\$19.95
DS-005	disk for this book (3.5)	\$15.95
SS-005	Lichty/Eyes: Programming the IIgs in Asm Lang	\$29.95
DS-008	disk for this book (3.5)	\$20.00
HS-010	Andrews: Prgmng IIgs in C and Asm Lang	\$18.95
SS-003	Eyes/Lichty: Programming the 65816	\$24.95
BB-001	Scanlon: Apple IIgs Asm Lang Programming	\$24.95

#### Technical References

AW-018	Apple: Technical Introduction to the Apple IIgs	\$9.95
AW-022	Apple: Apple IIgs Firmware Reference	\$24.95
AW-002	Apple: Apple IIgs Hardware Reference	\$24.95
AW-001	Apple: Apple Numerics Reference (new edition)	\$29.95
AW-014	Apple: Human Interface Guidelines	\$14.95
AW-017	Little: Exploring the Apple IIgs	(see 6/88) \$22.95
DS-007	disk for this book (3.5)	\$20.00
MB-001	Fischer: Apple IIgs Tech Ref	(see 6/88) \$19.95
